电子重开漏电探测器

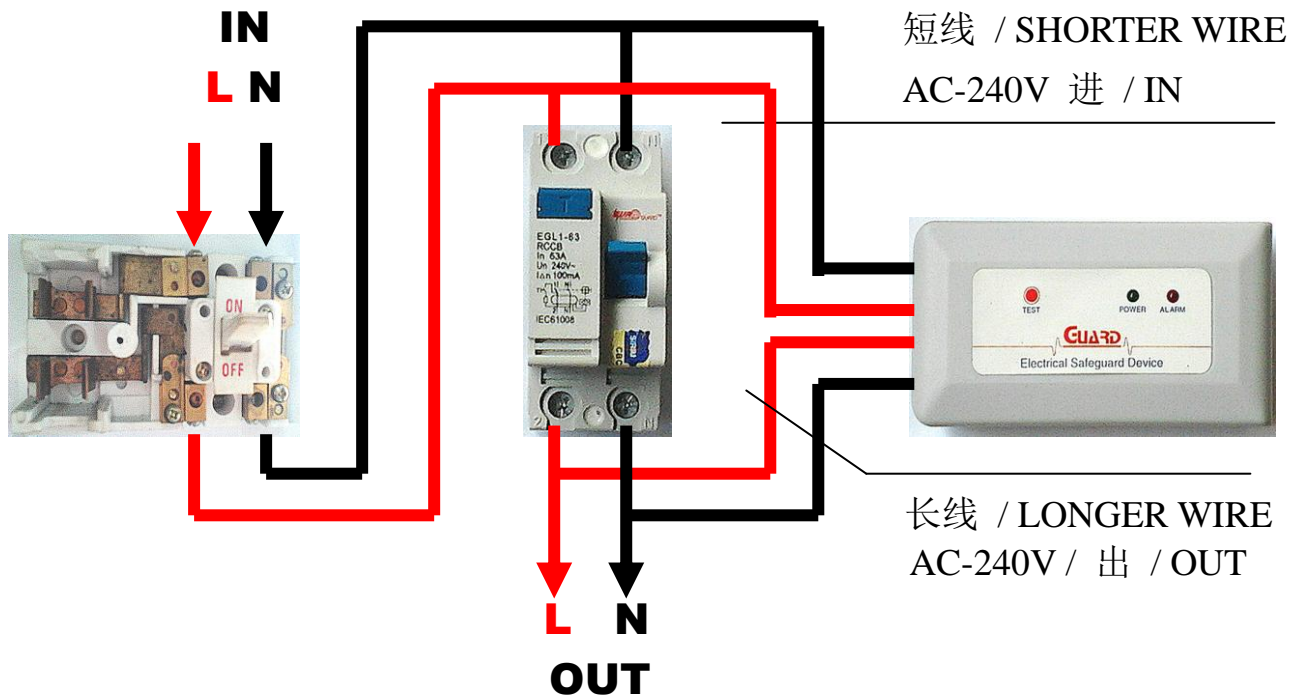

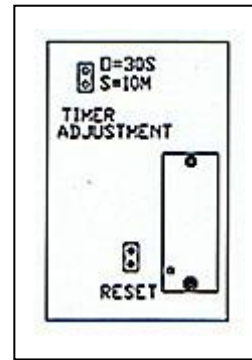

LEAKAGE ELECTRONIC ELCB

红色 LED 平时 3 秒闪一次显示正常操作

Normal operation Red LED every 3 second flash once

绿色 LED 显示电源 / Power on Green LED light up

(只能燕屋使用 use in swallow house only)

电子重开漏电探测器 能供应 **10A-AC** 电流, 能探测 **50MA** 漏电就立刻关电

- 1) 自动重开 : 每跳一次(30 秒)后自动重开, 1 小时内 , 跳 5 次后不再重开.
- 2) 记忆跳电次数 : 每跳一次, 红色 LED, 就 2 秒显示跳电次数的一次.
- 3) 自我测试 : 在(没有)记忆时, 按下(Test) 电源断开 5 秒后, 自动重开, 显示操作正常. 在 (有) 记忆时, 按下(Test) 将删除记忆.
- 4) 重开时间 : 开路时间(30 秒) , 短路时间(10 分钟)
- 5) 可以通过防盗系统重置电子重开漏电探测器.

LEAKAGE ELECTRONIC ELCB Can supply 10A-AC current
can detect 50MA leakage current, power off immediately.

- 1) Automatically reset : automatic reset leakage ELCB after it is trigger, every 30 seconds, If reset-counter reach 5 within 1 hour, no longer auto reset, must manual reset ELCB
- 2) Reset-count indicate by red LED flashing, number of pulse every 2 second
- 3) Self-test : when reset-counter is 0 , press the (Test) to test ELCB
If reset-counter is not 0 (red LED flashing), press the (Test) will clear the counter.
- 4) **Reset time** : Open circuit (30 seconds), Short circuit (10 minutes)
- 5) LEAKAGE ELECTRONIC ELCB can wire to Alarm system, manual reset by Alarm system
